with "ONC Webinar" in the
subject line.

Need to certify your EHR application or software for Meaningful Use Criteria but not sure where to begin? SLI Global Solutions is pleased to invite you to join us on March 7th for a **FREE** webinar: ***"A Guide to Achieving Meaningful Use through EHR/EMR Certification"***.

There is a lot of information out there in regards to the ONC Requirements for Meaningful Use and here at SLI Global Solutions we would like to make testing and certification easier for vendors and hospitals that are looking to certify their systems.

We are an ONC-ATCB, one of the certifying bodies that are governed by the ONC, who test and certify against the meaningful use criteria. Customer service is very important to us and that is why we'd like to offer this free webinar to provide as much information as we can about our process and the program as a whole in order to aid efforts in certifying technology for meaningful use.

This will be purely educational, no sales pitch. In this one hour event, which includes a 15 minute Q&A, we will address the following:

1. Who is the ONC and what role do they play?
2. How do you get started with certification?
 - a. Vendors: Choosing what type of certification to apply for
 - b. Providers: Certifying a homegrown EHR/EMR
 - c. Evaluating ONC requirements and how they relate to your product/technology to determine your ideal type of certification
 - d. Certification options overview
3. What is the certification process from start to finish?
4. FAQ's:
 - a. What are the Certification Requirements for Stage 2 and Stage 3 Meaningful Use and how do they affect your current certification?
 - b. What are the requirements for re-testing a new release or version of a certified EHR/EMR technology?
 - c. Why would a vendor or an organization even want to get their EHR/EMR certified? What is the purpose of the program?

About SLI Global Solutions:

SLI Global Solutions helps customers around the globe manage their technology risk and investment. An ISO 9001:2008 and ISO 17025 certified company, we provide the highest standards of quality while offering innovative, cost-effective solutions in a highly-professional, client-focused atmosphere.

Since our founding in 1996 as SysTest Labs, SLI Global Solutions' focus has been on helping customers build quality and innovation into their products and system implementations, while minimizing technology risk. We provide software testing to dozens of commercial clients, quality assurance and independent verification and validation of large IT systems to state governments, and are specifically accredited to test and certify electronic election systems and electronic health records systems. Our testing and quality solutions support clients both nationwide and internationally.

Our competencies are delivered in the following areas: Health IT & Medicaid, EHR Certification (ONC-ATCB), Government Solutions, Election Systems Certification Testing, and Quality Assurance & Software Test.
